TEGOLA[®] 
CANADESE

Ideas that last.
The building industry
is full of new ideas,
but those that last tend
to have a solid simplicity
about them.

2

11

12

13

14

Protection
with a volcanic
temperament.

Incandescent lava became
basalt rock became granules.
Nature made them exceptionally
hard, strong and resistant,
with a beauty that is unique,
incomparable.

TEGOLA

A "multi-layered" guarantee.
Silica sand, Tia Juana bitumen,
pre-impregnated fibreglass and a
surface of ceramised granules which
give the tiles their colour and finish.
The granules are coloured using a
very high temperature ceramisation
process and inorganic pigments.
This guarantees permanent
colourfastness, protects the
underlying bitumen layers from
ultraviolet rays and prevents
the shingle from deteriorating
over time.
Fibreglass provides exceptional
strength and dimensional stability.
Blown, modified bitumen ensures
a high degree of water-proofing.

TEGOLA

From earth to sky:
a shingle's factory.

The process of making shingles begins with a search for the right raw material and continues with a fully-automated manufacturing process, which uses the latest machinery and quality control tools. Our highly sophisticated logistical system packs and stores the products straight off the assembly line, delivering them to customers on all five continents. Tegola Canadese pays particular attention to the preparation of expert installers, who undertake continuous training in Tegola Canadese's training centre.

Colour champion.
Perfect colour matching
of your roof to any environmental
context thanks to the wide range
of colours. The choice is yours.

10 advantages

Wide range of shapes and colours

A product for every climate

Colours do not fade

A lightweight roofing system

No maintenance required

25

- Ceramised granules
- Blown Tia Juana bitumens
- Heavy pre-impregnated fibreglass
- Blown Tia Juana bitumens
- Siliceous sand

- Can be used successfully to cover roofs of any shape
- No special accessories are required
- Can be used successfully to cover roofs of any pitch
- Easy to transport and handle
- Practical package

TEGOLA

Endless advantages. Choosing Tegola Canadese shingles means choosing a roof that is varied, eclectic and colourful, resistant to any climate and extreme weather condition. On top of that, it does not deteriorate over time, is very quiet, light and stable, and is easy to install and maintain.

1

A huge range of shapes and colours

6 different models and 42 colours, among which to choose the most suitable roof for your project.

A product for all types of climate

- Resists freezing conditions (tested at -70°C)
- Resists the heat (tested at +90°C)
- Wind resistant
- Not affected by environmental pollution
- Resists sudden temperature changes
- Resists heavy rain.

2

3

It can be used successfully on roofs of any shape

Any kind of project can be carried out easily and with the maximum safety.

4

Colours do not change through time

The granules are made from basalt, which is a "strong" material that does not absorb the water and hence does not deteriorate. The granules are dyed by means of a ceramisation process that occurs at a high temperature. This ensures the shingles are colourfast.

5

A lightweight roofing system

Comparison of the weight of different roofing systems for a 300sqm surface.

Advantages:

- Smaller size of the load bearing structures
- Less total weight corresponds to less load in the building site and on the roof .

No maintenance needed.
 You can walk on it safely.
 It is easy to inspect.
 The shingles do not slip.
 It is weather resistant.

No need for special accessories.

1. Along the hips.
2. Where the roof pitch changes.
3. Along the valleys.
4. Along the ridges.

Can be used in a wide range of pitches.
 Comparison of the roof pitches allowed for the different roofing systems.

Additional advantages.

Compared to bituminous roofs:
 A roof made with Tegola Canadese shingles consists of small elements that easily absorb any movement of the structure and guarantee roof breathability.
 Compared to metal roofs:
 Noiseless in case of rain or hail
 There is no condensation
 Does not become rusty

Practical packaging.
 Does not break during transport.
 Easy to handle and store.
 Easy to lift up to the roof.

advantages

TEGOLA

Everything on a single roof.
 Quality, adaptability, beauty, light weight, duration, efficiency: these are the characteristics of any Tegola Canadese roof.
